2. Climbing back and looking ahead
3. Building the digital experience – now and what’s next
Cautionary Note Regarding Forward-Looking Statements

Certain information contained in this and other presentations by CarGurus at Navigate® 2020, other matters discussed at Navigate 2020 and answers that may be given in response to questions at Navigate 2020 may include “forward-looking statements.” We may, in some cases, use terms such as “anticipates,” “believes,” “could,” “estimates,” “expects,” “intends,” “likely,” “may,” “might,” “plans,” “potential,” “predicts,” “projects,” “seeks,” “should,” “target,” “will,” “would,” or other words that convey uncertainty of future events or outcomes to identify these forward-looking statements. In particular, statements in this and other presentations regarding: industry trends; our market awareness; our business and growth strategy and our plans to execute on our growth strategy; the growth levers we expect to drive our business; our brand awareness efforts; our ability to grow the size and engagement of our consumer audience; our investments in and ability to drive adoption of new and existing products and their benefits, including revenue growth opportunities; the attractiveness and value proposition of our current offerings and other product opportunities; our ability to maintain existing and acquire new customers; our success in international markets; our future financial and business performance; and other statements regarding our plans, prospects and expectations, are examples of such forward-looking statements. These forward-looking statements are subject to a number of risks and uncertainties, including, without limitation, risks related to our growth and ability to grow our revenue, our relationships with dealers, competition in the markets in which we operate, market growth, our ability to innovate, our ability to realize benefits from our acquisitions and successfully implement the integration strategies in connection therewith, natural disasters, epidemics or pandemics, like COVID-19 that has negatively impacted our business, our ability to realize cost savings and achieve other benefits for our business from our expense reduction efforts, our ability to operate in compliance with applicable laws, as well as other risks and uncertainties as may be detailed from time to time in our Annual Reports on Form 10-K and Quarterly Reports on Form 10-Q and other reports we file with the Securities and Exchange Commission. These factors could cause actual results and developments to be materially different from those expressed in or implied by such statements. Forward-looking statements do not guarantee future performance and actual results may differ materially from those projected. The forward-looking statements are made only as of the date of this (or other applicable) presentation at Navigate 2020 and we undertake no obligation to update such forward-looking statements to reflect subsequent events or circumstance.

This and other presentations by CarGurus at Navigate 2020 also contain estimates and other statistical data, including those relating to our industry and the market in which we operate, that we have obtained or derived from internally-prepared studies and surveys, third-party studies, industry publications and reports, as well as other publicly available information prepared by a number of third-party sources. We rely on both internal data and Google Analytics for data relating to our own key business metrics and, for consistency, we rely on Comscore and, as applicable, third party studies for data relating to comparisons with our competitors. Google Analytics, Comscore and applicable third-party studies use different methodologies to derive their data and therefore their data for similar statistics are not comparable. These third-party studies and industry publications and reports generally indicate that they have obtained their information from sources believed to be reliable, but do not guarantee the accuracy and completeness of their information. This information involves a number of assumptions and limitations, and you are cautioned not to give undue weight to these estimates, as there is no assurance that any of them will be reached. Based on our experience, we believe that these third-party studies and industry publications and reports are reliable and that the conclusions contained therein are reasonable. In addition, you are cautioned not to rely on our extrapolations of internally-prepared studies and surveys and/or third-party studies, as these are estimates involving a number of assumptions and limitations, which we are unable to ensure will be reached.

CarGurus lays off 13 percent of staff, citing coronavirus

By Andy Rosson Globe Staff, Updated April 16, 2020, 6:10 p.m.

The online vehicle-shopping service CarGurus said Thursday that it is cutting 13 percent of its staff, in the latest reversal for a Massachusetts tech company amid the economic fallout of the COVID-19 pandemic.
We move **QUICKLY**

"If there was ever any validation that CarGurus is in an extraordinarily dominant position, your robust, aggressive, early decision to change your subscription prices caused a widespread ripple effect through the rest of the vendor community. Across not just digital marketing, but other services that are provided to dealers, you guys set the pace.... It saved us money beyond our relationships with you -- it was a wakeup call to a lot of your competitors. Great job."
